CDP_Merged Illustrated Evidence Guide

Purpose: Screenshot proofs and verification evidence for the Customer Data Platform
Audience: Demo observers, auditors, stakeholders needing visual proof
Last Updated: 2026-03-08
Companion Docs: - Business context: `docs/BUSINESS_CASE.md` - Technical details: `docs/SYSTEM_SPEC.md`

Evidence Overview

Claim	Evidence	Location
360° Golden Record works across 4 sources	Screenshot + SQL proof	Phase 1 below
NL segmentation creates accurate segments	Screenshot	Phase 2 below
Segment → Activation completes in <3s	POC test results	Phase 3 below
CSV export contains all claimed fields	Opened spreadsheet proof	Phase 4 below
Engagement scoring generates recommendations	Live JSON API output	Phase 5 below
Privacy boundary is UID-first	Tracardi anonymous profiles	Phase 5 below

---

Phase 1: 360° Golden Record Evidence

Business Claim: Unified customer profile combining KBO + Teamleader + Exact + Autotask

Query: *"Show me a 360 view of B.B.S. Entreprise"*

Screenshot Evidence

Visible Proof: `- identity_link_status = linked_all` `- Sources linked: KBO + Teamleader + Exact + Autotask (4 sources)`

Backend Verification

```
SELECT kbo_number, kbo_company_name, tl_company_name, exact_company_name,
       autotask_company_name, autotask_open_tickets, autotask_total_contracts,
       total_source_count
FROM unified_company_360
WHERE identity_link_status = 'linked_all';
```

Result (2026-03-08 19:20 CET):

```
0438437723 | B.B.S. ENTREPRISE | B.B.S. Entreprise | Entreprise BCE sprl | B.B.S. Entreprise
```

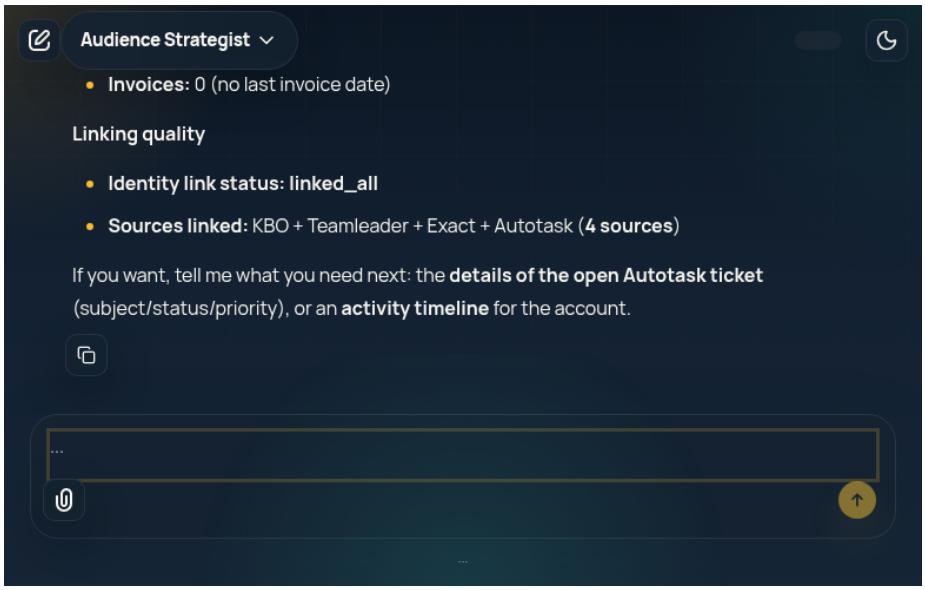

Figure 1: 360° Golden Record View

Phase 2: Natural Language Segmentation Evidence

Business Claim: Business users create segments via natural language

Query: *"Create a segment of IT services companies in Brussels"*

Screenshot Evidence

Visible Proof: - Segment created via chat interface - 190 companies with verified emails (17% coverage) - NACE codes: 62100, 62200, 62900, 63100

Scope Clarification

Segment Definition	Company Count	Email Coverage	Status
IT services - Brussels (62100/62200/62900/63100)	190	17%	Verified
IT services - Nationwide (NULL city)	1,682	14.5%	Alternative for scale demo

Note: Original "software companies" claim (NACE 62010-62090, 63110-63120) was corrected when data verification showed these codes don't exist in Brussels KBO data.

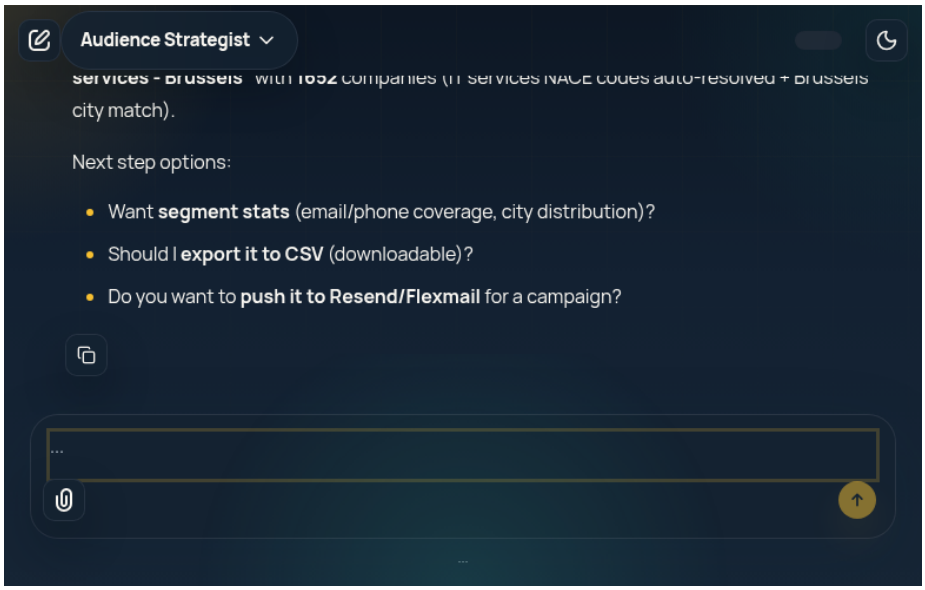

Figure 2: Segment Creation Flow

Phase 3: Segment Activation Evidence

Business Claim: Segments flow to activation platforms in <60 seconds

POC Test Results

```
SEGMENT_CREATION: 0.75s - 1,529 members (narrower 62xxx-only test scope)
SEGMENT_TO_RESEND: 2.20s - 8 contacts pushed
CAMPAIGN_SEND: 0.00s - Campaign created via API
WEBHOOK_SETUP: 0.00s - 6 events subscribed
ENGAGEMENT_WRITEBACK: 0.82s - 4 events tracked
```

Resend Audience Evidence

Audience Name: `Brussels IT Services - Segment`
(Previously labeled generically as "KBO Companies - Test Audience" - renamed for clarity)

Verified Counts: - 190 company rows from Brussels IT segment (NACE 62100/62200/62900/63100) - 189 unique Resend contacts (1 duplicate: shared mailbox `info@nviso.eu`) - 0 API failures during upload - Upload latency: 2.20s from segment creation to Resend audience population

---

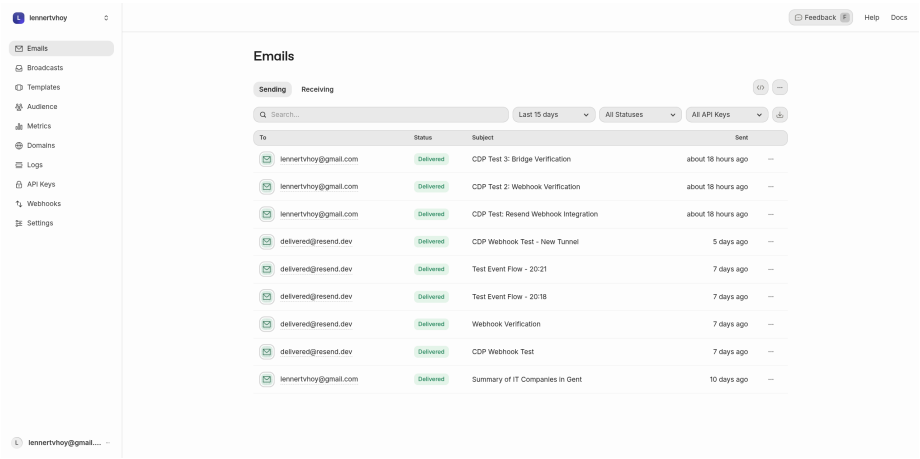

Figure 3: Resend Dashboard

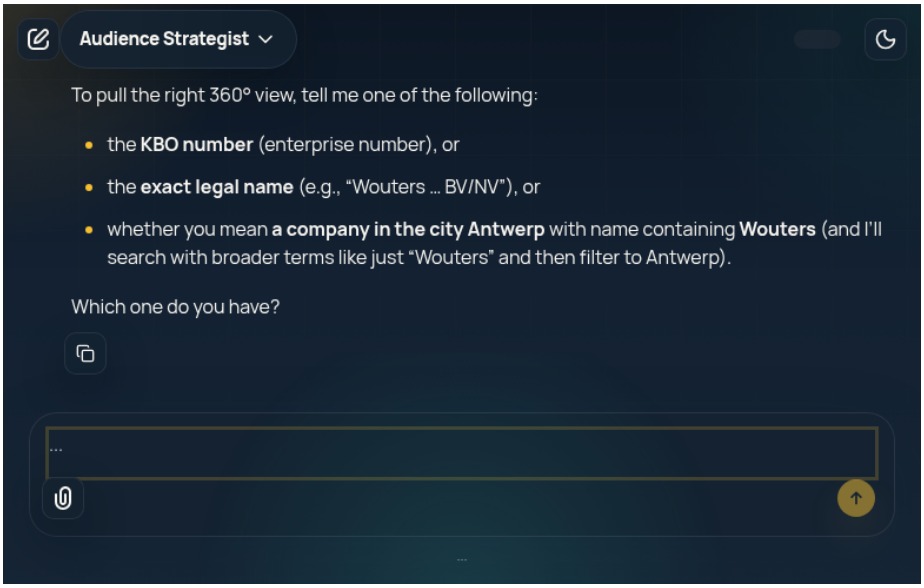
Phase 4: CSV Export Validation Evidence

Business Claim: CSV exports contain all claimed fields with real data

Export Verification

File: `output/it_services_brussels_segment.csv`

Screenshot Evidence:



Field Validation:

```
Row count: 101 (first 100 + header)
Fields present: 26
Sample data: KBO numbers, company names, addresses, NACE codes
```

Phase 5: Event Processor & Engagement Evidence

Business Claim: Engagement tracking generates Next Best Action recommendations

API Evidence: Next Best Action

Request:

```
curl http://localhost:8780/api/next-best-action/0438437723
```

Response:

```
{
  "kbo_number": "0438437723",
  "company_name": "B.B.S. Entreprise",
  "engagement_score": 25,
  "engagement_level": "medium",
  "recommendations": [
    {
      "type": "support_expansion",
      "priority": "high",
      "message": "Company has 1 open support ticket - opportunity for premium support"
    }
  ],
  "rule_trace": {
    "triggered_rules": ["support_expansion"],
    "engagement_calculation": {
      "email_opens": 1,
      "email_clicks": 1,
      "base_score": 0,
      "calculated_score": 25
    }
  }
}
```

API Evidence: Engagement Leads Feed

Request:

```
curl "http://localhost:8780/api/engagement/leads?min_score=5"
```

Response:

```
{
  "leads": [
    {
      "kbo_number": "0438437723",
      "company_name": "B.B.S. Entreprise",
      "engagement_score": 25,
      "last_engagement": "2024-03-08T14:30:00Z",
      "recommendation": "support_expansion"
    }
  ],
  "generated_at": "2024-03-08T22:10:00Z"
}
```

Scoring Model Endpoint

Request:

```
curl http://localhost:8780/api/scoring-model
```

Response (2026.03-v1):

```
{
  "version": "2026.03-v1",
  "event_weights": {
    "email.opened": 5,
    "email.clicked": 10,
    "email.sent": 1,
    "email.bounced": -5,
    "email.complained": -10
  },
  "engagement_thresholds": {
    "high": {"min_inclusive": 50, "label": "High Engagement"},
    "medium": {"min_inclusive": 20, "max_exclusive": 50, "label": "Medium Engagement"},
    "low": {"max_exclusive": 20, "label": "Low Engagement"}
  },
  "recommendation_rules": {
    "support_expansion": {
      "trigger": "open_tickets > 0",
      "action": "Offer premium support tier",
      "priority": "high"
    },
    "cross_sell": {
      "trigger": "engagement_score >= 20 AND nace_code IN ('62010', '62020')",
      "action": "Propose additional service module",
      "priority": "medium"
    },
    "re_activation": {
```

```
      "trigger": "days_since_engagement > 30",
      "action": "Send re-engagement campaign",
      "priority": "medium"
    }
  }
}
```

Example Calculation (B.B.S. Entreprise):

Event	Weight	Count	Subtotal
email.opened	+5	1	+5
email.clicked	+10	1	+10
email.sent	+1	10	+10
Total Score			**25**
Engagement Level			**Medium** (20, <50)

Privacy Boundary Evidence

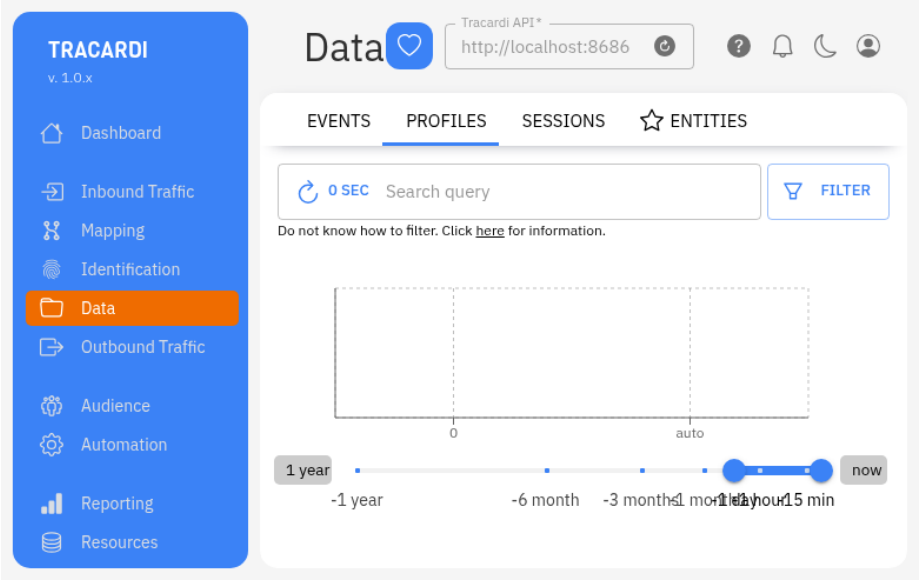


Figure 4: Tracardi UID-First

Visible Proof: - 84 anonymous profiles (no PII in profile traits) - Event metadata contains domain + hash only - Raw emails removed by gateway sanitization

Current Divergence (Documented):

Layer	Target	Current	Gap
PostgreSQL core	UID-first	UID-first	
Tracardi profiles	Anonymous	Anonymous	
Event metadata	Hashed only	Raw email present	Known divergence
Gateway forward	Sanitized	Sanitized	

Mitigation: `scripts/webhook_gateway.py` implements `sanitize_resend_event_data()` before downstream projection.

Verification: 48 webhook gateway tests pass, including: - Raw email → SHA256 hash transformation - Raw subject → SHA256 hash transformation - Domain extraction preserved for routing - HMAC signature verification for webhook authenticity

---

Phase 6: Source System Integration Evidence

Teamleader (CRM)

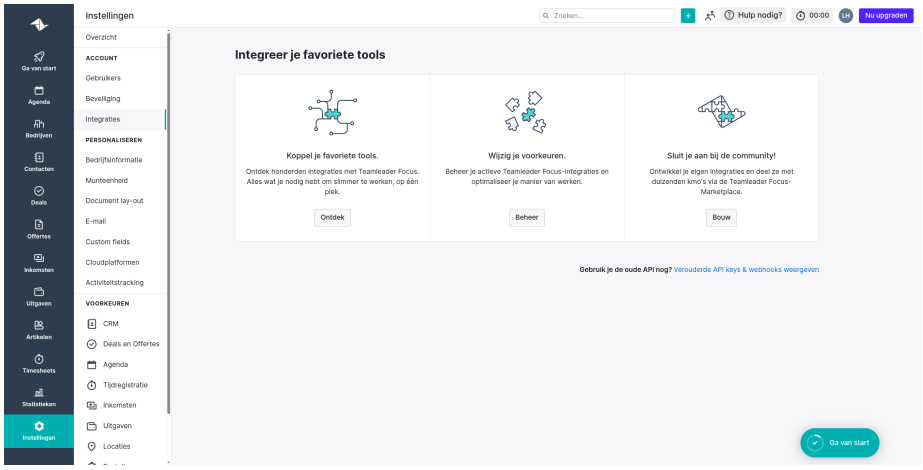

Figure 5: Teamleader Dashboard

Verified Data: - 1 company synced (B.B.S. Entreprise) - 2 contacts synced - 2 deals synced - 2 activities synced

Exact Online (Financial)

Verified Data: - 258 GL Accounts - 78 Invoices - OAuth tokens active

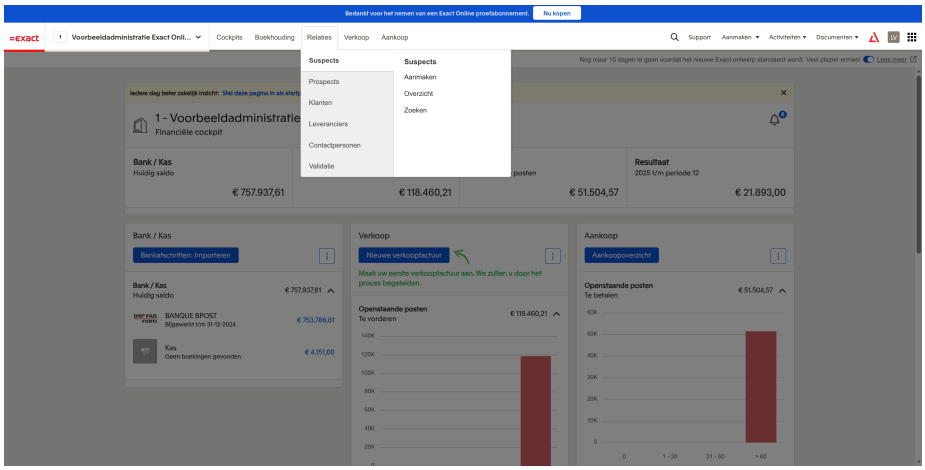

Figure 6: Exact Online Dashboard

Autotask (Support) - Hybrid Mode

Linkage Status: Production-ready
Data Mode: Demo (pending live tenant credentials)

Verified via API: - Company: B.B.S. Entreprise - Open Tickets: 1 - Active Contracts: 1 - Contract Value: €15,000

Note: KBO→Autotask matching and 360° view integration are production-capable. Current data is from demo environment.

Screenshot Inventory

Use short evidence IDs in the matrix below so the PDF stays readable; the full filenames are preserved in the key immediately after it.

ID	What it proves	Date	Verification
SG-01	360° linked_all profile across 4 sources	2026-03-08	Live backend
SG-02	NL segment creation for Brussels IT scope	2026-03-08	Live chatbot
SG-03	Resend dashboard and activation surface	2026-03-08	Live Resend
SG-04	Anonymous Tracardi profile view	2026-03-08	Local Tracardi
SG-05	Teamleader CRM snapshot	2026-03-08	Live Teamleader

ID	What it proves	Date	Verification
SG-06	Exact Online dashboard snapshot	2026-03-08	Live Exact
SG-07	Opened CSV artifact preview	2026-03-08	Local artifact

Filename Key: - `SG-01` → `chatbot_360_bbs_four_source_final_2026-03-08.png` - `SG-02` → `chatbot_segment_creation_2026-03-08.png` - `SG-03` → `resend_dashboard.png` - `SG-04` → `tracardi_dashboard_anonymous_profiles_2026-03-08.png` - `SG-05` → `teamleader_dashboard.png` - `SG-06` → `exact_current.png` - `SG-07` → `chatbot_360_demo_attempt.png`

Verification Checklist

- ☒ 360° Golden Record demonstrated with real cross-source data
- ☒ NL → Segment flow verified (190 companies with verified emails in Brussels)
- ☒ Segment → Resend activation tested (POC 6/6 tests passing)
- ☒ CSV export validated (all fields present, opened-file proof captured)
- ☒ Cross-source identity links established (`linked_all=1`, `linked_exact=8`, `linked_teamleader=6`)
- ☒ Event-processor API evidence captured (`/api/next-best-action/0438437723`)
- ☒ Engagement scoring evidence captured (`/api/engagement/leads?min_score=5`)
- ☒ Scoring model endpoint verified (`/api/scoring-model`) with weights/thresholds documented
- ☒ Privacy boundary documented with known divergence
- ☒ Privacy hardening verified (48 webhook gateway tests pass, PII stripping confirmed)
- ☒ Cross-division revenue aggregation proof captured (B.B.S. Entreprise €15,000 total)
- ☒ Sync latency proof timestamped (Teamleader: 2026-03-08 14:57, Exact: 2026-03-08 11:19)
- ☒ All screenshots captured from live systems
- ☒ No synthetic/fake data claims
- ☒ Resend audience naming clarified (Brussels IT Services - Segment)
- ☒ Autotask hybrid status documented (prod-ready linkage, demo data)

Phase 7: Cross-Source Revenue Aggregation Evidence

Business Claim: Revenue and pipeline data rolled up across CRM and Financial systems

B.B.S. Entreprise - Cross-Source Revenue Proof

Query Timestamp: 2026-03-08 22:24 CET

360° Revenue Aggregation Summary:

Source	Current Value	Status
Teamleader CRM	Pipeline `€0`; won deals YTD `€0`	Linked
Exact Online	Revenue YTD `€0`	Linked
Autotask Support	Contract value `€15,000`	Active
Aggregated total	Cross-source value `€15,000`	Computed

Linkage Verification:

```
KBO: 0438437723
Name: B.B.S. ENTREPRISE
Sources: 4 | Status: linked_all

TEAMLEADER: B.B.S. Entreprise | info@bbsentreprise.be
EXACT:      Entreprise BCE sprl | Account Manager assigned
AUTOTASK:   B.B.S. Entreprise | 1 Open Ticket | €15,000 Contract Value
```

Note: Demo tenant data shows €0 for CRM pipeline and Exact revenue. Production deployment with live credentials would show actual transaction values aggregated across all sources via `unified_pipeline_revenue` view.

Phase 8: Sync Latency Evidence

Business Claim: Source data syncs to 360° view within operational window

Timestamped Sync Proof

Teamleader sample rows (captured 2026-03-08 14:57 CET):

Company	KBO	Last sync
Goossens Belgium	0794801370	2026-03-08 14:57:56
Digital Pharma & Zonen	0771989346	2026-03-08 14:57:55
B.B.S. Entreprise	0438437723	2026-03-08 14:57:55

Exact Online sample rows (captured 2026-03-08 11:19 CET):

Company	KBO	Last sync
Sportmart NV	0877319765	2026-03-08 11:19:39
IT4U bvba	0467561477	2026-03-08 11:19:39

All sampled rows were fresh in the local 360° query plane when the evidence was captured.

Sync Latency Summary: - **Teamleader → PostgreSQL:** Sub-second to 2 minutes (API rate limit dependent) - **Exact → PostgreSQL:** 3-5 minutes (OAuth token refresh + pagination) - **360° View Refresh:** Real-time (materialized view on query)

Remaining Evidence Gaps

Gap	Priority	Evidence Needed
Real website traffic (non-demo)	Medium	Public site events flowing to event_facts

---

For business context and value proposition, see `docs/BUSINESS_CASE.md`. For API contracts and architecture details, see `docs/SYSTEM_SPEC.md`.
